✉ jonaslimhx@gmail.com | [in](#) LinkedIn | [GitHub](#) | [Blog](#)

ML practitioner and technical leader with 7 years building and operating production AI systems across automotive, semiconductor, and SaaS domains. Deep hands-on expertise in machine learning, deep learning, GenAI, and Agentic AI, complemented by strong cross-functional stakeholder engagement across business, product, and engineering teams. Experienced in defining AI standards, model evaluation frameworks, and data quality governance to ensure reliable and responsible AI deployment at scale.

PROFESSIONAL EXPERIENCE

Co-Founder & Software Architect

May 2024 - Jun 2026

NockHub, Singapore | nockhub.com

- Architected and governed a fully serverless backend on AWS (Python, Terraform) with 40+ data schemas and 30+ production APIs.
- Defined engineering standards and delivery governance across a team of 3 engineers, ensuring consistent quality and accountability across product workstreams.
- Evaluated and integrated GenAI tooling into product workflows, establishing internal guidelines for responsible use, data handling, and model selection.
- Gathered business requirements from non-technical stakeholders and translated pain points into prioritized, documented system features.
- Grew adoption to 4 ranges, 7,000+ users, and 4,000+ bookings per month.

Senior Machine Learning Engineer

Jun 2022 - Jul 2024

Carro, Singapore

- Delivered production ML systems across predictive pricing, vehicle damage detection, and engine acoustics for multi-market automotive operations.
- Defined model acceptance criteria, evaluation frameworks, and quality gates for ML systems deployed to GPU clusters serving 12,000+ requests per day.
- Led technical assessment, risk evaluation, and production transition from Mask R-CNN to YOLOv5; reduced inference time from 500ms to 50ms with no service disruption.
- Established data quality standards and built a feature store and metadata store; improved training data quality by 50%, enabling repeatable and auditable model validation.
- Partnered with product, operations, and data teams across Singapore, Malaysia, Indonesia, and Taiwan to align AI systems with business objectives and operational constraints.
- Standardised ML workflows and tooling across the engineering team, reducing operational overhead by 75 engineer-hours per month and improving development consistency.

Data Scientist

Jun 2019 - May 2022

Micron Technology, Singapore

- Built a defect classification model operating within semiconductor quality controls; improved inspection tool capacity by 10%.
- Built and deployed a predictive yield model within on-premises compliance constraints, contributing to USD 11M in cost savings.
- Delivered end-to-end ML solutions from problem framing to production deployment, collaborating with engineering, quality, and operations teams in a regulated manufacturing environment.

EDUCATION & AWARDS

Master of Computer Science (Data Science & AI)

Aug 2024 - Jun 2026

University of Sydney, Australia

Distinction

Singapore IMDA SG Digital Scholar (Infocomm Media Development Authority)

- Capstone Project: AI-Powered Tour Guide using Unitree Go2 quadruped robot – applied GenAI and Agentic AI in real-world deployment.

Bachelor of Engineering (Aerospace)

Aug 2015 - May 2019

Nanyang Technological University, Singapore

First Class Honors, Highest Distinction

TECHNICAL EXPERTISE

ML/AI: PyTorch, TensorFlow, GenAI, Agentic AI, LLMs

AI Governance: Model evaluation, data quality governance, ML workflow standardisation

Languages: Python, SQL, TypeScript, Dart, Bash

Cloud & Infrastructure: AWS, GCP, Terraform, Firebase

Data Engineering: PySpark

Backend & APIs: FastAPI, Docker

Databases: PostgreSQL, MySQL, MongoDB, DynamoDB, DocumentDB, RDS

Robotics & Middleware: ROS 2

HACKATHONS

2025 Global Health Systems Hackathon Hub, "Building High-Value Health Systems: Leveraging AI". Team I Know You Know won 2nd place in Sydney and placed Top 20 globally.

CERTIFICATIONS

AWS Certified Solutions Architect - Professional

Jan 2024
