PROFESSIONAL SUMMARY

Software architect and technical lead with 7+ years delivering end-to-end software systems across ML, cloud infrastructure, and data engineering. Proven track record leading cross-functional engineering teams, architecting scalable cloud-native and serverless solutions, and driving full software development lifecycle from requirements to production deployment. AWS Certified Solutions Architect – Professional. Experienced collaborating with product, operations, and business stakeholders across multiple countries to translate requirements into working systems.

PROFESSIONAL EXPERIENCE

Co-Founder & Software Architect (Technical Lead)

May 2024 - Jun 2026

NockHub, Singapore | nockhub.com

- Led end-to-end software implementation: gathered business requirements, defined system architecture, and managed delivery across a team of 3 engineers to on-time production releases.
- Architected a fully serverless backend on AWS (Python, Terraform) implementing infrastructure-as-code, CI/CD pipelines, and automated deployments across 40+ schemas and 30+ production APIs.
- Enforced secure-by-design practices: applied least-privilege IAM, encrypted data at rest/in transit, and conducted architecture reviews for customer-facing services.
- Tracked delivery progress, managed risks and change requests, and maintained stakeholder alignment throughout the implementation lifecycle.
- Grew platform to 4 ranges, 7,000+ users, and 4,000+ bookings per month.

Senior Machine Learning Engineer

Jun 2022 - Jul 2024

Carro, Singapore

- Led ML system delivery across predictive pricing, vehicle damage detection, and engine acoustics – owning architecture, implementation, and production operations.
- Built distributed data pipelines, a feature store, and a metadata store; improved training data quality by 50% and reduced pipeline processing from 7 days to 9 hours.
- Deployed scalable ML microservices on GPU clusters handling 12,000+ requests/day; reduced model inference time from 500ms to 50ms via YOLOv5 migration.
- Reworked team ML infrastructure, DevOps tooling, and CI/CD workflows, saving 75 man-hours/month per engineer.
- Optimized AWS cloud infrastructure (networking, databases, training servers), saving USD 120k in 2023.
- Collaborated cross-functionally with product, operations, and data teams across Singapore, Malaysia, Indonesia, and Taiwan.

Data Scientist

Jun 2019 - May 2022

Micron Technology, Singapore

- Delivered end-to-end ML solutions from problem framing through production deployment on on-premises servers.
- Built and deployed a predictive yield model contributing to USD 11M in cost savings.
- Engineered data pipelines and optimized SQL queries, reducing processing time by 50%.
- Built a defect classification model that improved semiconductor inspection tool capacity by 10%.

EDUCATION & AWARDS

Master of Computer Science (Data Science & AI)

Aug 2024 - Jun 2026

University of Sydney, Australia

Distinction

Singapore IMDA SG Digital Scholar (Infocomm Media Development Authority)

- Capstone Project: AI-Powered Tour Guide using Unitree Go2 quadruped robot.

Bachelor of Engineering (Aerospace)

Aug 2015 - May 2019

Nanyang Technological University, Singapore

First Class Honors, Highest Distinction

TECHNICAL EXPERTISE

Cloud & Infrastructure: AWS (SAP certified), GCP, Terraform, serverless, IAM security

Data Engineering & Big Data: distributed pipelines, feature stores, PySpark

Backend & APIs: Python, FastAPI, TypeScript, RESTful services

Languages: Python, SQL, TypeScript, Dart, Bash

DevOps & CI/CD: Docker, GitHub Actions, automated deployment, configuration management

ML / AI / BI: PyTorch, TensorFlow, predictive modelling, data science

Databases: PostgreSQL, MySQL, MongoDB, Redis, DynamoDB, DocumentDB, RDS

Frontend / Mobile: Flutter, React Native

CERTIFICATIONS

AWS Certified Solutions Architect - Professional

Jan 2024

HACKATHONS

2025 Global Health Systems Hackathon Hub, "Building High-Value Health Systems: Leveraging AI". Team I Know You Know won 2nd place in Sydney and placed Top 20 globally.
