PROFESSIONAL SUMMARY

Engineer with 7+ years delivering production AI systems and full-stack applications across APAC markets, with experience spanning MNCs and early-stage startups. Experienced in embedding with customer teams, leading end-to-end deployments from first prototype to stable production, and scoping complex technical systems in fast-moving environments. Proven track record of driving production adoption, surfacing field feedback to sharpen model performance, and codifying delivery patterns into reusable tooling. Hands-on in Python, JavaScript, FastAPI, and Flutter. AWS Certified Solutions Architect – Professional.

PROFESSIONAL EXPERIENCE

Co-Founder & Software Architect

May 2024 - May 2026

NockHub, Singapore | nockhub.com

- Led customer discovery with shooting range operators to surface workflow pain points; scoped and sequenced the delivery roadmap, and removed blockers before they hit the team.
- Personally coded and owned end-to-end delivery of a full-stack serverless platform on AWS (Python, Flutter) – 40+ schemas, 30+ production APIs – from first prototype to stable production across 4 customer sites.
- Made deliberate trade-offs between scope, speed, and quality to protect each release; adjusted delivery plans in real time to keep a 3-engineer team on track.
- Guided operators through workflow changes and adoption; grew to 7,000+ active users and 4,000+ bookings per month.

Senior Machine Learning Engineer

Jun 2022 - Jul 2024

Carro, Singapore

- Forward deployed to Malaysia and Taiwan to embed with local engineering and operations teams; led on-the-ground rollout, drove production adoption of AI-powered services, and surfaced field feedback to product and engineering teams to sharpen model performance.
- Identified inference bottleneck in production damage detection; scoped and shipped YOLOv5 migration replacing Mask R-CNN, reducing latency from 500ms to 50ms end-to-end.
- Built full-stack AI microservices (Python, FastAPI) on GPU clusters serving 12,000+ requests per day; designed feature store and metadata store that improved training data quality by 50%.
- Codified team AI delivery practices into shared tooling and reusable pipelines; saved 75 man-hours per engineer per month and reduced deployment inconsistency across markets.
- Optimized AWS networking, databases, and training infrastructure; saved USD 120k in annual operating costs.

Data Scientist

Jun 2019 - May 2022

Micron Technology, Singapore

- Embedded with semiconductor manufacturing engineers to conduct domain discovery; translated fab process expertise into feature selection criteria and project success requirements.
- Designed and deployed a predictive yield model to on-premises production servers; contributed to USD 11M in operational savings.
- Built a defect classification model for wafer inspection; improved inspection tool capacity by 10%.

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL, Dart, C, Bash

AI & Machine Learning: Generative AI, Hugging Face, PyTorch, TensorFlow

Backend: FastAPI, Express.js, Docker

Frontend: Flutter, React

Cloud & Infrastructure: AWS, GCP, Terraform, Firebase

Databases: PostgreSQL, MySQL, MongoDB, Redis, DynamoDB, DocumentDB, RDS

Robotics & Middleware: ROS 2

EDUCATION & AWARDS

Master of Computer Science (Data Science & AI)

Aug 2024 - Jun 2026

University of Sydney, Australia

Distinction | Singapore IMDA SG Digital Scholar (Infocomm Media Development Authority)

- **Natural Language Processing:** Fine-tuned LLaMA 3.2 and trained a language model to generate SQL from natural language queries.
- **Cybersecurity:** Used Codex to automate vulnerability scanning across real-world applications, identifying exploitable weaknesses in the wild.

Bachelor of Engineering (Aerospace)

Aug 2015 - May 2019

Nanyang Technological University, Singapore

First Class Honors, Highest Distinction

CERTIFICATIONS

AWS Certified Solutions Architect - Professional

Jan 2024

HACKATHONS

2025 Global Health Systems Hackathon Hub, "Building High-Value Health Systems: Leveraging AI" – Team placed 2nd in Sydney and Top 20 globally.
