PROFESSIONAL SUMMARY

Machine learning engineer and software architect with 7+ years delivering production AI systems – from model research to cloud infrastructure at scale. Track record of measurable impact: USD 120k cloud cost reduction, 10× CV inference speedup, USD 11M yield improvement, and co-founding a SaaS platform to 7,000+ users and 4,000+ monthly bookings. IMDA Digital Scholar completing an MCS; equally effective owning a model, a microservice, or an engineering team.

PROFESSIONAL EXPERIENCE

Co-Founder & Software Architect

May 2024 - Jun 2026

NockHub, Singapore | nockhub.com

- Architected a fully serverless AWS backend (Python, Terraform) – 40+ data schemas and 30+ production APIs – scaled to 7,000+ users and 4,000+ monthly bookings across 4 partner ranges.
- Shipped 3 production Flutter Web Apps end-to-end; set and maintained code quality and delivery standards across a 3-engineer team.
- Drove product discovery to deployment: translated operator pain points into Figma prototypes, prioritized the roadmap, and converted requirements into production system architecture.

Senior Machine Learning Engineer

Jun 2022 - Jul 2024

Carro, Singapore

- Engineered and deployed ML systems for predictive pricing, vehicle damage detection, and engine acoustics – serving 12,000+ requests per day on GPU clusters across 4 markets.
- Replaced Mask R-CNN with YOLOv5 in production; cut inference latency 10× (500ms → 50ms), enabling real-time damage assessment at scale.
- Optimized AWS networking, RDS, and training infrastructure; eliminated USD 120k in annual cloud spend.
- Re-architected a monolithic crawler into an event-driven distributed system; reduced data processing time from 7 days to 9 hours (97% reduction).
- Built feature store, data prep pipelines, and metadata store; improved training data quality by 50%.
- Redesigned team ML workflows and tooling; recovered 75 engineer-hours per month across the team.

Data Scientist

Jun 2019 - May 2022

Micron Technology, Singapore

- Developed and deployed a predictive yield model to on-premises production servers, contributing directly to USD 11M in process savings.
- Built a semiconductor defect classification model deployed to inspection tooling, increasing throughput capacity by 10%.
- Optimized SQL pipelines powering model training and inference; cut query execution time by 50%.
- Owned full ML lifecycle across multiple initiatives – problem framing, feature engineering, model development, and production deployment.

EDUCATION & AWARDS

Master of Computer Science (Data Science & AI)

Aug 2024 - Jun 2026

University of Sydney, Australia

Distinction

Singapore IMDA SG Digital Scholar (Infocomm Media Development Authority)

- Capstone Project: AI-Powered Tour Guide using Unitree Go2 quadruped robot.

Bachelor of Engineering (Aerospace)

Aug 2015 - May 2019

Nanyang Technological University, Singapore

First Class Honors, Highest Distinction

TECHNICAL EXPERTISE

Languages: Python, SQL, TypeScript, Dart, C, Bash

ML / AI: PyTorch, TensorFlow, scikit-learn

Data Engineering: PySpark, feature stores, data pipelines

Backend & APIs: FastAPI, Docker, REST, serverless (Lambda, API Gateway)

Cloud & Infrastructure: AWS (EC2, S3, RDS, DynamoDB, SageMaker), GCP, Terraform, Firebase

Databases: PostgreSQL, MySQL, MongoDB, Redis, DynamoDB, DocumentDB

Frontend / Mobile: Flutter, React Native

Robotics & Middleware: ROS 2

HACKATHONS

2025 Global Health Systems Hackathon Hub, "Building High-Value Health Systems: Leveraging AI". Team I Know You Know won 2nd place in Sydney and placed Top 20 globally.

CERTIFICATIONS

AWS Certified Solutions Architect - Professional

Jan 2024
